Allwebco Design Corporation Web Templates:

http://allwebcodesign.com

Founded in 1996 Allwebco Design Corporation offers a wide range of, not just ordinary website templates, but rather complete websites with built-in javascripts, Flash, CSS and multiple pages for experienced web developers as well as novice web users. Offering a library of almost 200 different website template models as well as hosting, domain registration and search engine promotion, any individual or company looking to setup their own website can find everything they are looking for at http://allwebcodesign.com Allwebco offers all users timely template support and a comprehensive support area at http://www.allwebco-templates.com/support/ as well as a template user's forum for interaction between template users.

Template Features:
http://allwebcodesign.com/features-home.htm

All Allwebco templates feature global javascript editable plain text menus, headers, footers and sidebars. This makes for quick site updates. All pages on any site can be updated by editing a single file. Features built into Allwebco templates include: Exclusive template stock photos, pre-configured art and photography galleries, Flash XML image changers, mp3 music players, built-in contact forms, text menus, Paypal shopping carts, dynamic FAQ sections, built-in virtual tours, quote forms, text and news scrollers and other javascripts, multiple pre-formatted pages and Flash headers that can be updated by editing a plain text file. Flash software is not required to edit any area in any template. All Allwebco templates can be edited with any plain text editor or any HTML editor including: Notepad, Expression Web, Frontpage, Dreamweaver, Netscape Composer, Contribute, Netobjects Fusion, CoffeeCup and many more. All templates are compatible on both PC and Mac and in all popular web browsers. Step by step instructions are included and no special software is required for setup.

mobi-Hybrid Templates:
http://allwebcodesign.com/setup/mobi-templates.htm

Built for fast load times at under 20kb per page, and device flexibility, Allwebco mobi-Hybrid templates can be used on any type of domain including .com, .org, .biz or .mobi. Mobi-Hybrid PHP templates feature global menus, stylesheets and footers. All standard replaceable .jpg images. Javascript and external CSS free. (CSS stylesheet is a PHP "include" file.) Written in basic HTML and PHP, mobi-Hybrid templates include step-by-step instructions, and timely e-mail support. Can be used with any hosting company that offers PHP. Compatible in all newer web browsers. IE, Chrome, Firefox, Safari, Netscape, Opera, as well as compatibility on all mobile devices, phones, laptops and netbooks.

Art Galleries:

http://allwebcodesign.com/setup/cool-2.htm

Allwebco art & photo gallery templates include javascript image viewers that create web pages on the fly, thus helping keep the number of pages to maintain on any site to a minimum. Features include: Expandable gallery pages, optional built-in image watermarks and right click protection to help protect your web images.

Mp3 Templates:

http://allwebcodesign.com/setup/sounds.htm

Allwebco Mp3 musician templates feature a built-in music player choice for each song link between Windows media, RealAudio, Quicktime and Flash players. Pre-formatted pages and a musician photo gallery and video gallery are included in all Mp3 models. All templates are expandable.
